Table Structures of Table Files (.dbc, .frx, .lbx, .mnx, .pjx, .scx, .vcx)

Visual Studio .NET 2003

The descriptions of the table structures are stored in files located in the FILESPEC directory. The FILESPEC directory contains two project files: 60SPEC.pjx and 26SPEC.pjx. The 60SPEC.pjx file contains tables and reports that document Visual FoxPro versions 8.0, 7.0, 6.0, and 5.0 table files. The 26SPEC.pjx file contains tables and reports that document FoxPro version 2.6 table files.

To see the descriptions for any table structure, print the appropriate report. The following tables list the file types and their associated reports. Some file types require more than one report because there are too many columns to fit across a single page.

> **Note**   All the reports are formatted for landscape printing.

Visual FoxPro 8.0, 7.0, 6.0, and 5.0 File Types

To see the table structure of a...	Print this report	Which uses
Database[1]	60DBC.frx	60DBC.dbf
Form and Visual Class Library	60SCX1.frx 60SCX2.frx	60SCX.dbf
Menu[2]	60MNX.frx	60MNX.dbf
Project	60PJX1.frx 60PJX2.frx	60PJX.dbf
Report and Label	60FRX1.frx 60FRX2.frx	60FRX.dbf

1 The database properties can be printed from 60DBCPRO.frx.
2 The location field in Visual FoxPro 6.0 structure differs from Visual FoxPro 5.0 structure. Additional fields to support pictures in Visual FoxPro 7.0 are included in the report.

FoxPro version 2.6

To see the table structure of a...	Print this report	Which uses
Screen	26SCX1.frx 26SCX2.frx	26SCX.dbf
Menu	26MNX.frx	26MNX.dbf
Project	26PJX1.frx 26PJX2.frx	26PJX.dbf
Report and Label	26FRX1.frx 26FRX2.frx	26FRX.dbf
